How many charges will a 30000mAh power bank provide? As previously discussed on our site, the real capacity of a power bank is smaller than its actual capacity. Roughly speaking, you'll get about 75% of the listed capacity. So a 30000mAh power bank will provide an actual charge of around 22500mAh.

Its USB-A port provides up to 2.1A output and a built-in 5W Qi charger enables you to charge Qi-compatible devices wirelessly. To charge the power bank's high-capacity battery, simply place its integrated solar panel in direct sunlight, or connect to a USB power source via the included 30cm Type-C to Type-A cable.
