To that end, I've recently acquired a 360 Systems MIDI Patcher. (This is the older model with 4 inputs and 8 outputs, not the newer version with 8 inputs, 8 outputs, and the large 8-character display.) However, I haven't been able to find many details about this particular model. Does anyone have a link to a scan of the manual?

It was inevitable really. As MIDI-expander mania takes over most of the known keyboard world, 360 Systems of California have brought out a unit dedicated solely to the production of chip-stored, monophonic sampled bass sounds. A pretty nifty idea in theory, relieving your synth from the chore of producing a monophonic bass sound when it could be doing something more ...
