The Uconnect on your Dodge Ram is programmed to be used with certain aftermarket camera kits. This DIY focuses on installing the Echo Master kit and running it through the chassis. So rather than spend close to a thousand dollars for another person to install it, why not save on costs and spend an hour doing it yourself.

I mounted the camera on the license plate frame. You run the camera power from the back-up light, to the camera. Then, you run an rca av cable to the monitor in the vehicle. For that, I took power from the radio main power and ground wires on the harness.

Every wire that came with the S100 was 100% plug and play. They included everything that was needed. Their new Main harness plugged into the factory harness. The antenna harness connected to the factory one and everything just clipped in. There is a you tube video showing the install on a 2013. 5 minute install and really was.

The Uconnect, hands-free system offers more than just a wireless phone-connect feature--you can also install a rear-view camera out of it. As a plus, the system isn't that difficult to install. This article applies to the 4th Generation Dodge Ram (2009-Present).

The factory stereo system. The Ram's base system was a perfectly acceptable AM/FM/CD/AUX receiver with six speakers. Further up the line, owners could add things like satellite radio, steering wheel audio controls, Bluetooth® connectivity, a touchscreen receiver, a rear-view camera and, in the larger trucks, a rear-seat entertainment system.
