

# Antigravity lithium car battery reddit

C8 General Discussion - New Lithium Battery option from Antigravity Batteries - Hi Everyone, Antigravity Batteries here and we just signed on recently as site sponsors and wanted to drop some information on our NEWEST Line of Lithium Batteries and accessories... We wanted to make our new line of batteries accessible...

For example the typical Lithium Battery in a Dirt Bike offers roughly 2.2 Amp Hours, yet Antigravity offers 3.3 Amp hours in our RE-START model (40% larger battery) and up to 5 Amp Hours (100% large battery) in similar sized batteries!

4 days ago; The Antigravity Batteries RE-START Car Batteries come in EXACT FIT OEM sizes for most all Performance and Passenger Cars. We are the First Lithium-Ion Battery company to offer the most popular BCI sizes including H5/Group 47, H6/Group 48, H7/Group 94R, Group 35 and others. These sizes are standard sizes in most every Hi-Performance European and ...

PERFORMANCE BENEFITS. Weight: The ultralight Antigravity RE-START Batteries weigh from 8.5 lbs to 16.5 lbs (4-7 Kg) depending on the model. On average this equates to a weight loss from 35- 60 lbs (16-27 Kg) over a typical lead/acid battery! The incredible weight savings will increase your vehicle's performance in several key areas such as handling, allowing shorter braking ...

Buy Antigravity Batteries; ATX20-HD Heavy Duty Lithium Ion Battery with Dual Polarity and Battery Management System (BMS) - 900 CCA 5.18 Pounds 30Ah - AG-ATX20-HD: Batteries - Amazon FREE DELIVERY possible on eligible purchases ... Deals & Rebates Best Sellers Parts Accessories Tools & Equipment Car Care Motorcycle & Powersports Truck RV ...

You can buy a lithium replacement battery for your car no problem. Antigravity is one brand producing them. The biggest problem - cost aside - is that lithium batteries do NOT like being cold. A lead acid battery in good condition will start a car when it's 110 F outside, or -40 F outside.

An Antigravity battery is a lithium-ion 12-volt car battery that features the brand's proprietary RE-START (RS) technology, making it the world's first car battery with built-in jump-starting ...

The CTEK Brand of chargers is recommended for all of our RE-START (RS) Batteries (models with built-in jump-starting and full BMS protections), as well as our HEAVY DUTY (HD) Batteries (models with full BMS but no restart). This includes ALL of our Automotive Batteries of any size and our newest line of Powersports Batteries with model number suffix "RS" or "HD".

Antigravity RE-START automotive batteries come in exact fit OEM sizes for Performance and Passenger cars & trucks. Antigravity Batteries were the first lithium-ion battery company to offer popular BCI sizes, including the H5/Group 47, H6/Group 48, ...

This battery is part of their RE-START line of car batteries that feature a built-in jump-starting, wirelessly activated with the included keyfob.

You don't need some expensive ass lithium battery for a 2500 RMS build but if you plan to go bigger it's your best option.. If you want solid power but plan to go bigger in the future start with ...

A couple things to note. Lithium is also way lighter. A 100Ah battery weighs like 27lbs. Your two AGM

## Antigravity lithium car battery reddit

batteries will weigh about 60lbs each. The only real drawback for lithium batteries is the current draw. For the things you described, you'll be fine, but a 100Ah lithium battery you don't want to draw more than 100A for an extended period of time.
