The medium sized power stations that are around 250-400 watts can draw up to 65 watts of power from a solar panel. For those I recommend the panels that are 100 watts, anything larger will just waste energy.

Hi all. I've been thinking through a simple 12v system for a shed by my pond. Rooting around Amazon I came across this kit from AQWSD that claims to be 800W (2x400) for just \$280. It looks like it comes with a junk PWM controller which I would replace with something like this (or maybe this...is it worth nearly double?) but even the panels alone at that price would be \$0.35/W; ...

Their size and weight make them less practical to install in most residential solar situations, nor are they cost-effective. The large footprint of 500 W solar panels makes them harder to fit into the nooks and crannies of a residential roof.

SolarEdge, JA Solar, Trina Solar, Jinko and Longi: solar panel brands reviewed by owners. To help you narrow down the choice from your installer, or check how a suggested brand compares, we surveyed more than 2,000 people with solar panels on their homes.

Misleading. Reviewed in the United States on ...

The BougeRV Yuma 100W Solar Panel is the most flexible solar panel in the market. With its CIGS thin-film solar cell technology, it offers long-term benefits that can last for at least 25 years. Unlike other semi-flexible panels that only last 1-3 years, the BougeRV CIGS Flexible Solar Panel is a more reliable and cost-effective choice.
