Most inverters have revenue grade meters installed internally. My Tesla installation came with a SolarEdge inverter that has the ANSI certification on the side, so I was able to use the inverter's readings for SRECs. I've also seen Delta inverters with similar labels.

Operating an inverter and a generator simultaneously will void the warranty. SolarEdge requires installing a physical or electronic interlock, which will prevent the generator and inverter from operating simultaneously. Interlock procurement, installation, maintenance and support are the responsibility of the installer.
