To calculate the BigQuery storage price, with query data of 2.5TB per month, we need the storage price, which is \$20 per 1TB at the time of writing. Multiply 2.5TB by \$20, and you get the monthly storage cost. $2.5 \times 20 = \$50$. To calculate on-demand query pricing using the same query data, the price is \$5 for 1TB.

Bangui Thermal power station is an operating power station of at least 50-megawatts (MW) in Bangui, Central African Republic. Location Table 1: Project-level location details. Plant name Location Coordinates Bangui Thermal power station Bangui, Bangui, Central African Republic
