The PowerBrace(TM) is a patented foundation wall repair system that's designed to stabilize failing basement walls and provide the potential to straighten walls over time. These steel i-beams ...

After a recommendation from a friend, he decided to call Woods Basement Systems. Our foreman Juan Hernandez had the perfect solution for William's problem. Wall support and foundation problems can be fixed in many ways, and here at Woods we have the right solution to fit your home. In William's basement, we installed our PowerBrace system.

This Boyertown, PA homeowner was worried about the foundation wall in the garage. After a free in home estimate, Inspector Tyler Holcombe concluded the wall was bowing inward. The inward movement of the foundation wall caused the concrete block to crack. Knowing the damage it was causing, the customer was pleased to know Liberty Basement Systems had the solution to ...

To straighten buckling basement walls that are perpendicular to the floor joists, a Perpendicular Gorilla Wall Brace is used. Unique in the industry, the Perpendicular Gorilla Wall Braces utilize the support of three floor joists. This allows the Perpendicular Gorilla Wall Brace to push off of three floor joists, increasing the pushing strength over other systems on the market that push off of ...

Homeowner Jeff B. of O'Fallon, Missouri was concerned about the cracks forming on the walls of his basement. He knew that it was not a good sign for his home, and a risk to his investment. Knowing the sooner he would fix it the better, he decided to call Woods Basement Systems.

Brent B. had two adjacent walls with diagonal cracks beginning in the bottom corner, going all the way to the top of the wall. This is a telltale sign of wall failure, which could have derived from improper drainage outside, where water collects after rain. Ignoring wall cracks in the basement is not recommended, as over time
