

Bedside cover that can store electricity

Humans may at some point develop a system which can cheaply and effectively collect and store electricity from lightning. Technological innovation is a natural part of human societies, and advances are constantly being made. 18th century humans would have been astounded by the things developed in the 19th century, for example.

Inevitably, some energy is lost as it goes into storage, and more is lost as it comes out. Right now, hopes are riding high on lithium ion batteries, because they have impressive round-trip efficiencies, can pack in high densities of energy, and can charge and discharge thousands of times before becoming degraded.
