China, with its burgeoning energy needs, is the world's leader in the use of solar hot water systems. That presence was felt at the 2005 Solar World Congress with a few solar hot water product offerings from the country. Among these were the evacuated solar thermal hot water heating systems from Beijing Sunda Solar Energy Technology. Each system includes a ...

Please check your solar collector according to the following list. In case there are still problems after the check or the energy output is not sufficient, please contact our service team. Does the collector have the correct orientation?

News: From March 7 to 10, 2019, Mr. Wang Jianwei, the president of China National Huachen Energy Holding Group(SUNDA's Group Corp.) and Ms. Li Wei, the president of Beijing Sunda Solar were invited to visit Malta to attend the business negotiation conference for Malta tops Europe's economic growth projections by the President of the Republic of Malta.

Beijing Sunda Solar Energy Technology Co., Ltd. is a worldwide leading manufacturer of evacuated tube solar collectors. Sunda was jointly founded by the DASA and SUNPU in 1995, based on two parties" research in the solar thermal field for over 10 years. Although it has very proud history, Sunda has been working hard on manufacturing and R& D excellence ever since.

Beijing Sunda Solar Energy Technology Co. Ltd. B5.rtf//07/14/97/Sheet 20 3. Back-up research on market, potential partner, budget, general requirements Time requirement: ca. 3 - 6 months Cost: China visit 1 week/person: ca. 10.000,- DM 4. Selection of potential partner, technical or other cooperation if feasable

Beijing Sunda Solar Energy Technology Co., No. 3 Huayan Road, Haidian District 100083 Beijing City People's Republic of China Seido 2-16 KT05 02 Complete test according to DIN EN 12975-1,2 "Thermal solar systems and components -- Solar Collectors" This test report contains the results of the preliminary test report

In recent years the institute focused on research in solar absorption air- conditioning with solar collectors and an absorption chiller as its main components since the technology of using solar energy for space heating and hot water is quite mature. The location in Beijing features temperatures between the highest 38°C in summer and the ...

The most important initiative towards renewable energy was the Energy White Paper which was announced in 2004. The initiative includes several measures and is worth AUS\$700 million. ... Since December 2004 solar thermal technology is also eligible for funding under this program. The funds are allocated to the states in order to best meet the ...

CH,DE,AT,UN ... Proportion of the final energy that, thanks to the solar system, can be saved compared to a

...

Beijing Sunda Solar Energy Technology Co., Ltd. is a global manufacturer of evacuated tube solar collectors, owning a variety of patents and international certificates. Sunda's quality products are widely applied in water heating, solar air-conditioning, and even CSP.

Company Introduction: Beijing Sunda Solar Energy Technology Co., Ltd. is a worldwide leading manufacturer of evacuated tube solar collectors. Sunda was jointly founded by Beijing Sunpu Technology Co., Ltd. As the affiliate company of Beijing Solar Energy Research Institute and Daimler-Benz Aerospace (DASA) in 1995.

Manufacturer: Beijing Sunda Solar Energy Technology Co., Ltd No. 3 Huayan Road, Haidian District 100083 Beijing City People's Republic of China Type: Seido 2-16 Reference code of the TZSB: KT05_02 Testing method: Complete test according to DIN EN 12975-1,2 "Thermal solar systems and components - Solar Collectors"

Beijing Sunda Solar Energy Technology has been developing solar thermal technology for 30 years. With technology from Germany, our evacuated tube solar collectors and heaters meet the quality expectations of the hot water, pools and spas, space heating, solar air-conditioning, and sea water desalination industries. We have over 10 international ...

Sunda's support site provides you with information on Sunda's agents, products and the website. We are providing the addresses of our distributors worldwide, also including your country or area, and how you can contact them. With the goal of easing the utilization of Sunda collectors, we have composed a list with Frequently Asked Questions.

When planning to design a solar water heating system the following data has to be known: The number of people and hot water consumption per person/year. The local solar irradiation and air temperature in months and hours of sunshine per year. The deviation from the north/south line to correct the orientation of the solar collector
