Bird Netting Bird netting is a protective barrier designed to shield solar panels from bird-related damages and disturbances. Birds can be a significant problem for solar panel installations, as they tend to perch on or build nests around the panels, causing various issues. Bird droppings, debris from nests, and pecking can reduce the solar panel

3. Bird Netting. Bird netting is a cheaper alternative to mesh screens. Simply wrap the netting around the edge of the panel to prevent pigeons from getting under it. Netting is less durable than meshing but providing it is installed correctly it will make your panels impenetrable for years to come. 4. Solar Panel Edging

If you find yourself asking, "why birds nest under my solar panels?", you're not alone . We listed a few proven pigeon proofing tips below, but first let's explain why they are ...

As solar panels are often at height additional steps may be required to gain safe access; for best results we recommend mesh is installed at the same time as the solar panels to minimise additional expense for access. We offer a Tracked 48 service on all orders through Royal Mail or Parcelforce..

Rooftop solar panels can create an ideal environment for pigeons and other pest birds to nest and roost. To prevent pest birds from accessing the area beneath solar arrays, consider using a solar panel bird deterrent.

It was dozens of beady little eyes observing from all angles, waiting patiently for us to leave so they could move into the new home made of solar panels we'd just built for them. Although the air conditioning plant already had a bird net, the bean counters didn't see the advantage in bird-proofing the solar array.

Bird netting solar panels

Bird netting around solar panels is highly effective in mitigating bird-related issues. It creates a physical barrier that prevents birds from accessing the areas beneath and around the panels.

The solar panel bird deterrent is a device designed to prevent pest birds from accessing the area beneath solar arrays. Solar panels create an ideal environment for pigeons and other pest birds to nest and roost due to the shade from the hot sun, security from predators, and an easy in-and-out vantage point for birds.

Bulk quantities of Solar Mesh is available in 100" rolls and our Solar Clips are available in packs of 35, 50, and 100 (sold separately).
