"I am writing to express my appreciation to C3M Power Systems for outstanding performance. As you know one of WMATA's top priority projects is the 700 MHz Radio/ Cellular Service project. We have a very aggressive construction schedule and your team continues to thoroughly support our efforts. [You] go above and beyond to help WMATA get our ...

With unmatched financial capacity, experience, equipment, personnel, and technical construction knowledge, C3M is capable of completing complex water, power and utilities projects nationwide. C3M works closely with clients across a wide range of disciplines, leveraging its experience to develop creative solutions to technical challenges, and ...

C3M is responsible for all electrical and controls work related to a new one-million-gallon-per-day pump station at Quantum Loophole's Quantum Frederick Data Center Campus in Frederick, Maryland. Return To All Water, Power and Utilities Projects &gt;

Monumental projects require an attention to detail and dedication to craftsmanship unlike any others in the construction industry. C3M's personnel have completed work on some of the most culturally significant projects in our Nation's Capital, including Smithsonian Institution's National Museum of the American Indian - Cultural Resource Center and Mall Museum, U.S. Botanic ...

C3M Power Systems and joint venture partner Aldridge Electric (C3M-Aldridge) are updating radio, cellular, and IT infrastructure across the entire Washington Metropolitan Area Transit Authority (WMATA) metro system. As part of the WMATA Fiber Optic Infrastructure and Metro Box Enclosure Installation project, C3M-Aldridge is installing more than ...

C3M Clark Cupertino is installing two new traction power substations at the Civic Center and Montgomery Street passenger stations. The scope of work includes structural, architectural, utility, and mechanical modifications to the facilities including demolishing portions of the concourse levels at both stations.

The project's overall scope includes installing a new overhead catenary system (OCS), replacing existing street-running tracks, upgrading five station platforms, as well as constructing two tracks adjacent to the street along 18 miles, 22 at-grade crossings, ...

C3M recently began work on its largest contract to date--a \$59-million systems upgrade project that will allow the transit system to accommodate 8-car trains on their Blue Line through ...

The Plane Train Tunnel West Extension project at Hartsfield-Jackson Atlanta International Airport in Atlanta, Georgia will extend the existing tunnel about 600 feet underneath the airport MARTA station and SkyTrain airport station, allowing more room for trains to turn back to go in the other direction while another train arrives to reduce wait times for the train and increase capacity.

C3M self-performs the construction, rehabilitation, and maintenance of complex electrical and special systems for roads, highways, and bridges. Our core strengths encompass electrical, communications, security, street lighting, intelligent transportation (ITS), ...

Mark was part of the founding leadership team for C3M Power Systems, which launched as a subsidiary of Clark Construction in 2014. During his time with C3M, Mark provided executive management and guidance to teams across the organization as they won and delivered some of the most sophisticated infrastructure projects in the country.

C3M's expertise in electrical, communications, security, street lighting, and traffic signal systems enables these one-of-a-kind structures to shine. And since these structures often occupy pedestrian-friendly, highly visible public sites, C3M is sure to perform its work while minimizing construction impacts to the local community, working ...

C3M, in partnership with Aldridge Electric, will install approximately four million feet of fiber optic cabling for radio, cellular, and IT infrastructure across the entire 100+ mile Metro system. To avoid disturbances to Metro system service, the project team will perform work during outages and non-revenue time periods.

C3M is providing electrical and fire alarm systems support for the Washington Metropolitan Area Transit Authority (WMATA) Northern Bus Garage Rehabilitation project in Washington, DC. The project team will also be installing electric vehicle chargers, solar panels, a SCADA system, lighting, lighting control, and lighting protection.

C3M provided new pathways for four circuits and controls for two new air compressors, an air dryer, a nitrogen generator, and a nitrogen receiver at Fort Meade Nitrogen Generation System in Fort Meade, Maryland.

C3M is proud to announce that it has been named one of the top 100 electrical contractors in Engineering News-Record's (ENR) annual Top 600 Specialty Contractors report. This year's report, "Top 600 Specialty Contractors: Firms Feel Pandemic's Pinch," detailed how C3M and other specialty contractors ... C3M Power Systems A Subsidiary ...

C3M was responsible for the complete installation of electrical systems including a new electrical utility service, power distribution, lighting, and receptacles, controls for the pump station. C3M also provided removal and reinstallation of traffic signal systems as well as conduit and fiber optic cabling within the nearby Howard Street Tunnel.

Last week, C3M held its quarterly Foreman's Meeting. Field leadership across the organization discussed topics such as safety, recent project awards, current pursuits, and best practices. The team also learned about the innovative use of prefabrication, new products, and virtual design and construction on one of our mass
