A portable power supply is a device that can store and provide electrical energy for various purposes. It can power small appliances, charge electronic devices, or supply emergency backup power in case of a blackout. Portable power supplies are usually rechargeable and have different capacities and features depending on the intended use.

Even "Deep Cycle" RV batteries do not like going below about 70% State-of-Charge....doing so dramatically shortens life. You can take a car battery down to 10% SOC maybe five times (if you promptly charge it right back up). ...

# Car battery for backup power supply

The Backup-Mobile UPS is designed to keep your equipment from losing power or rebooting during engine start-up, ensuring these spikes and sags in power don't shorten the life of your mission critical electronics. We do this by providing uninterrupted, clean, consistent power to your equipment, extending the life of your electronics up to 2 to 3 more years.
