

Renewable electricity has pushed through a series of positive tipping points in recent years, with 2023 set to pass a major milestone. This year, the world is predicted to pass a critical...

Researchers are developing battery technologies to fight climate change in two ways, by expanding the use of renewable energy and capturing airborne carbon dioxide. ... latest research news ...

Private and public investments in renewable energy must triple. The UN chief is calling for an adjustment to risk frameworks and more flexibility to scale up renewable ...

What are some examples of climate change mitigation? In Mauritius, UNDP, with funding from the Green Climate Fund, has supported the government to install battery energy storage capacity that has enabled 50 MW of intermittent renewable energy to be connected to the grid, helping to avoid 81,000 tonnes of carbon dioxide annually.. In Indonesia, UNDP has been ...

The Associated Press is an independent global news organization dedicated to factual reporting. Founded in 1846, AP today remains the most trusted source of fast, accurate, unbiased news in all formats and the essential provider of the technology and services vital to the news business. ... Harder to get renewable energy projects built in ...

Major shifts underway today are set to result in a considerably different global energy system by the end of this decade, according to the IEA's new World Energy Outlook 2023. The phenomenal rise of clean energy technologies such as solar, wind, electric cars and heat pumps is reshaping how we power everything from factories and vehicles to home ...

The future savings more than offset present investments to the extent that the transition would make sense from a purely economic standpoint even if we weren't worried about climate change.

The United States and China, the world's two largest climate polluters, have agreed to jointly tackle global warming by ramping up wind, solar and other renewable energy with the goal of ...

Renewable energy is an important element in the fight against climate change, reducing reliance on fossil fuels that release carbon dioxide into the atmosphere. ... "There has been good news in recent years in terms of progress on renewables," says Magda, "but in my opinion, the UK is still lagging behind. It is not so strong yet for truly ...

4 days ago; The House of Representatives Committee on Renewable Energy says it will investigate the usage of \$2 billion renewable energy grants to the country. The Chairman of the Committee, Rep. Victor Afam (LP-Anambra), said in a statement issued on Sunday, November 3, 2024, in Abuja. He said that the public hearing, scheduled for Tuesday, Nov. 5, [...]

Here are three takeaways as the first major U.S. climate policy turns one. "Rocket fuel" for renewable energy, but hurdles remain. Nearly \$200 billion in tax credits at the center ...

Energy lies at the core of the climate challenge -- and holds the key to its solution. Most greenhouse gasses responsible for causing global warming are produced by burning fossil fuels for electricity and heat.. Scientists widely agree that it's crucial to cut global greenhouse gas emissions by nearly half by 2030.They also emphasize the importance of achieving net zero ...

Renewable energy, if supported by governments, can "truly change the landscape" in terms of achieving equitable access to affordable and clean energy, but only if they can move from "commitment to action", according to the Director-General of the International Renewable Energy Agency (IRENA).

UN Climate Change News, 13 December 2023 - The United Nations Climate Change Conference (COP28) closed today with an agreement that signals the "beginning of the end" of the fossil fuel era by laying the ground for a swift, just and equitable transition, underpinned by deep emissions cuts and scaled-up finance. In a demonstration of global ...

Renewable energy resources, which depend on climate, may be susceptible to future climate change. Here we use climate and integrated assessment models to estimate this effect on key renewables.

A plan for renewables. Calling the report, a "dismal litany of humanity's failure to tackle climate disruption", UN Secretary-General António Guterres said that while time is running out to prevent the worst impacts of the climate crisis, there is a "lifeline" right in front of us. "We must end fossil fuel pollution and accelerate the renewable energy transition before we ...

Renewable energy, if supported by governments, can "truly change the landscape" in terms of achieving equitable access to affordable and clean energy, but only if they can move from "commitment to action", ...

Renewable energy is one of the most effective tools we have in the fight against climate change, and there is every reason to believe it will succeed. A recent New York Times column seems to imply ...

12 hours ago#0183; The stakes are once again high as the world heads to the 29th Conference of the Parties on Climate Change (COP29) from November 11-22, 2024, in Baku, Azerbaijan, which takes place in a year of record-breaking temperatures, unprecedented weather events across the globe, off-the-rails climate policies, missing climate finance, and just days after the election of ...

10 hours ago#0183; Renewable Energy. Climate Change & Meteorology. Agric & Biotech. Human Settlement. Sustainable Devpt. Oil & Gas. MORE. ... The climate change advisory opinion is the largest case ever before the ICJ, with record numbers of written statements and comments already submitted and 110 States and Intergovernmental Organisations scheduled to make ...

2022's biggest climate change bill pushes clean energy Experts weigh in on the pros and cons of the U.S. Inflation Reduction Act On August 16, President Joe Biden signed into law the Inflation ...

The risks posed by climate change and integration of renewable energy (Fig. 1a) are not independent but rather interconnected. Globally, large-scale integration of renewable energy will eventually ...

For Republicans, dealing with climate change ranks last among the 20 issues included in the survey. Consistent with this view, Republicans express limited concern about how climate change may impact the United States. In a spring 2022 survey, only 23% saw climate change as a major threat to the country's well-being.

Geothermal energy, which depends on heat from the Earth's interior, is the renewable energy source least affected by climate change impacts, but it provides only 0.4% of U.S. electricity.

The Renewables 2024 report, the IEA's flagship annual publication on the sector, finds that the world is set to add more than 5 500 gigawatts (GW) of new renewable energy ...

Governments, industry and other key players can now deploy a new action-oriented toolkit to ensure the global energy transition unfolds with equity, justice and sustainability as demand for minerals for renewables is poised to almost triple by 2030, according to a report released on Wednesday by a diverse expert panel convened by the UN chief.

Nationally Determined Contributions, countries' individual climate action plans to cut emissions and adapt to climate impacts, must set 1.5C aligned renewable energy targets - and the share of ...

Achieving the United States' ambitious emissions reduction goals depends in large part on the rapid adoption of wind and solar energy and the electrification of consumer vehicles. However, misinformation and coordinated ...

Achieving the United States' ambitious emissions reduction goals depends in large part on the rapid adoption of wind and solar energy and the electrification of consumer vehicles. However, misinformation and coordinated disinformation about renewable energy is widespread and threatens to undermine public support for the transition. In a new report, the Sabin Center ...
