ContiTech Power Transmission Group Power Transmission Group The ContiTech Power Transmission Group is a developer, manufacturer and supplier of power transmission belts, components and complete belt drive systems for vehicles, plant and machinery. The company is in demand throughout the world as a development and service partner for original

ContiTech Power Transmission Group The Synchromotion is the first truly endless PU timing belt from Continental. With this addition, we are significantly extending our standard belt range so customers can purchase the entire portfolio of drive belts from one single source. The Conti&#174; Synchromotion can be manufactured

ContiTech Flat Cord transmission belts are made with a single-layer, reinforcing section for a cross section which is thinner by 25% or more compared to plied belts of equal horsepower capacity. The high-tensile strength, multistrand synthetic cords used in Flat Cord belts provide maximum strength and minimum elongation.

As a division of the Continental Group, ContiTech is a recognized innovation and technology leader in natural rubber and plastics. As an industry partner with a Zirm future ahead of us, we engineer solutions both with and for our customers around the world. Our solutions are specially tailored to meet the needs of the market.

ContiTech is one of the world's leading industry specialists. The Continental group sector offers its customers connected, environment-friendly, safe and convenient industry and service solutions using a range of materials for off-highway applications, on rails and roads, in the air, under and above the ground, in industrial

environments, for the food sector and the furniture industry.

Friction Rings & Friction Wheels for Rolling Contact Drives and Drum Drives ROTAFRIX®; friction rings and friction wheels are particularly well-suited to use in drum drives.

The ContiTech Power Transmission Group develops and manufactures drive belts, matched components and complete belt-drive systems for vehicles, machines and systems. It's ContiTech's continual drive for improvement and exceptional research and development strategy that is at the heart of ContiTech's success.

Effective immediately, components such as timing belts, timing chains, accessories and tools for automotive workshops will no longer be sold under the ContiTech brand, but will ...

ContiTech Power Transmission Systems ContiTech Division of Continental AG. ContiTech Specialist in rubber and plastics technology The ContiTech Division is a development partner and original equipment manufacturer for many branches ...

Offering an increase in power transmission of up to 80 % and electrical conductivity\*, Conti®; SilentSync is a high performance upgrade on standard timing belts. The drive belt is up to 19 dB quieter than straight toothed belts in operation, its Helical Offset Tooth (HOT) design merging belt and sprocket into one of the quietest, smoothest and ...

The ContiTech timing belt drive design software (CONTI Professional) allows you to calculate a multitude of information that you need to accurately and efficiently design a timing belt drive power transmission system. Identifying what timing belt best fits your needs (pitch, timing belt tooth profile, timing belt width)

All AGRIDUR®; power transmission belts - whether wrapped V-belts, banded V-belts, variable-speed belts or multiple V-ribbed belts - are electrically conductive to ISO 1813, suitable for use in tropical climates, unaffected by dust and moderately oil-resistant.

ContiTech has a tradition of product excellence. Along with our extensive distributor network, ContiTech forms a team second to none in total product and service offerings. Our goal is to supply you with the best products.

ContiTech is an industry leader with an enviable history of product innovation and power transmission industry firsts, including: > SilentSync®; enhanced premium synchronous belts, ...

Any applications where a chain drive could be used or there is a need for a high-efficiency drive system; For use where Conti®; Synchrochain Carbon or Falcon Pd®; belts are specified or desired; System is backside idler compatible allowing for additional applications; Cast iron or steel construction; Stock on most popular application sizes.

The best-known examples of friction-locking power transmission are the vehicle tire/road and wheel/rail systems. The circumferential force required for propulsion is transmitted by the ROTAFRIX&#174; friction wheel to the rail by friction locking.

The ContiTech Power Transmission Group is a developer, manufacturer and supplier of power transmission belts. It is in demand throughout the world as a development and service partner for original equipment manufacturers and the aftermarket. As a full-line distributor, the ContiTech Power Transmission Group offers an extensive product

A powerful innovation in synchronous drive systems that provides more power capacity and quieter operation. Falcon Pd&#174; Soar with the latest drive system innovation that ... The ContiTech Power Transmission Group is a developer, manufacturer and supplier of power transmission belts, components and complete belt drive systems. The company is

ContiTech provide a complete offering of cogged, raw-edge belts in Narrow, Classical and FHP styles. Designated 3VX, 5VX, AX, BX, CX, 4L and 5L, cogged, raw-edge V-belts have higher capacity and efficiency and they use smaller sheaves than traditional envelope (wrapped) belts.

Our branded power transmission products are available through qualified distributors that are carefully selected and trained to provide much more than quality ContiTech products. A complete selection of value-added services are available including cost reduction programs, sales and technical support and inventory control programs.

## Contitech power transmission systems

ContiTech Power Transmission The Continental Power Transmission Group develops and manufactures drive belts, matched components and complete belt-drive systems for vehicles, machines and systems. This includes the SILENTSYNC®; premium synchronous belts, for reduced noise, reduced vibration and increased efficiency.
