The prep is roof penetration wiring down to the point where solar charge controller and inverter goes. Some Cougars at least 2019/2020 have the OTG solar prep. This allows three different plugs to be hot from the inverter when connected. The roof connectors and the side portable solar plug are all Zamp.

Many of Keystone RV's new campers such as the Cougar Half-Ton come standard with the manufacturer's OTG (Off-The-Grid) Solar/Inverter Prep, which consists of passthroughs and pre-wiring for solar power equipment. Keystone also offers the optional OTG Solar Camping Package with a roof-mounted solar panel and everything you need to enjoy clean, free energy.
