When energy demand is more stable, PSEG Long Island is better able to source electricity from lower cost and often cleaner power sources. This energy is not just cheaper, it is also better for the environment. During times of peak energy use, the energy supply often comes from less environmentally friendly power plants used only during those times.

Why does PSEG Long Island offer the Power to Save pricing option? When customers shift energy use to off-peak periods, it helps us provide electricity at a lower cost. That's because the most efficient energy resources can be used during off- peak periods and power simply costs more to produce during periods of high demand.

Addition of front-of-the-meter standalone energy storage for all utility service territories. Addition of new tabs
