

Duke energy progress solar program

Does Duke Energy offer other solar incentives? Duke Energy offers rebates to North Carolina customers who want to install a solar panel system. For homeowners, the program offers a \$0.60/Watt rebate for systems up to 10 kilowatts. The benefit is equivalent to \$3,600 for a 6 kilowatt (kW) system.

Green Source Advantage - Will allow large customers to secure solar power to offset the amount of power purchased from Duke Energy. This is an expanded version of a pilot program Duke Energy Carolinas provided. Duke Energy Headquartered in Charlotte, N.C., Duke Energy is one of the largest energy holding companies in the United States.

Payment Terms: Upon installation of the solar PV system and submittal to Duke Energy of a Certificate of Completion, applicant will receive a one-time payment of \$2.00 per watt DC, subject to acceptance and

A Duke Energy Trade Ally will help you select your system to ensure it meets the PowerPair requirements and provide you with a cost estimate. Submit an Interconnection Request Work with your Trade Ally to complete the Interconnection Request and select a preferred rider that will allow you to connect your system to the grid.

With Duke Energy's Shared Solar program in South Carolina, customers, including low-income residents, can participate in renewable energy without installing panels on their roof ... Duke Energy Progress serves about 169,000 customers; Duke Energy Carolinas has about 591,000. The Upstate introduction was an immediate hit - within two months ...

In addition, Duke customers selected for the PowerPair program must employ a Duke Energy Trade Ally, a solar and battery installer approved by Duke Energy. Customers can use the Company's Find It Duke program to locate approved companies knowledgeable about the program. Installers may apply to become a Duke Energy Trade Ally [here](#).

Currently, in North Carolina, Duke Energy has more than 6,000 customers who have private solar systems - with a total capacity of just over 50 megawatts. The program expects to increase North Carolina's private solar market by 200 percent over the next five years, providing an economic boost for the state's solar installation business as well.

To expand our renewable energy generation capacity and help build a more sustainable energy future, we are seeking property owners with acreage that can accommodate power generation, such as large-scale solar facilities.

Duke Energy's \$62 million solar rebate program - which will help North Carolina customers with the upfront cost of installing solar panels on their property - was approved this ...

Program to pair home solar installations with battery energy storage continues to help advance rooftop solar
