With our operating portfolio of 36 renewable energy sites ...

The journey toward a clean energy economy is complex and filled with technical, economic, and social challenges. Electricity models are key tools for driving this transformation, providing precision and insight into the potential outcomes of energy policies and technological shifts. At the Environmental Defense Fund (EDF), we are working to make these tools more ...

Leading the renewable energy charge for 35 years and counting. EDF is about more than just producing clean, renewable energy for today's world. We're committed to providing future generations with the means to power their lives in the most economic, environmental and socially responsible ways possible.

At EDF Renewables, we develop low-carbon solar and wind solutions to meet the region's electricity needs, while supporting its energy transition. EDF is the worldwide leader in hydropower solutions and the European leader of renewable electricity production.

These landmark projects fit perfectly with the EDF Group's Cap 2030 strategy of doubling its renewable energy net capacity in operation from 28 GW to 50 GW between 2015 and 2030 worldwide. Through our renewable energy developments, we are pleased to contribute to the Indian government's goal of reaching 220
