Electric fence solar panel charger

We have chosen to use a 12.5 gauge soft aluminum fence wire for this solar-powered electric fence. To justify this choice, here are some of the pros and cons of using aluminum fence wire in this gauge. Conducts electricity 4 times as well as steel wire (resistance of 10.3 ohms/Km). Is flexible and easy to twist and tie off by hand.

Learn how to harness the sun's energy to power your electric fence and protect your livestock efficiently and sustainably. Find step-by-step instructions, tips, and expert advice on selecting, ...

Step 4: Install the Solar Electric Fence Charger. The solar electric fence charger is the heart of your solar electric fence system. It converts the sunlight captured by the solar panels into electrical pulses that power the fence wires. Installing the solar electric fence charger correctly is crucial for the optimal functioning of your fence.

Deluxe Field Solar-Pak 6 Model DF-SP-LI 6 volt - Solar/Battery Operated - 25 miles. America's first solar-powered electric fence charger! Laser trimmed, computer precision, solid state circuitry provides reliable, powerful low impedance shock to end of the fence. Uses free energy from the sun for maximum shock - day or night. Eliminates need for expensive battery replacement or ...

Installing a Solar Electric Fence. Installing a solar fence is manageable for most do-it-yourselfers. The process involves mounting the solar charger where it will receive the maximum amount of sunlight, setting up posts, running the wire, grounding the system and attaching the fencing to the charger. The step-by-step process is outlined here.
