

As a state-owned energy company in China, Sinochem Group has laid down a solid foundation in petroleum sector with unswerving efforts during the past seven decades. ... energy business consists of the following professional sectors: exploration and production, oil trade, oil refining, storage and logistics, oil products marketing ...

New research promoting soft-side innovations and business models will expedite integration of electrochemical storage into common markets. Further government support is necessary to promote responsible R& D spending that enables serious cost reductions across solar, wind, and storage, while also decarbonizing electricity and transportation.

6 ¶ On November 7, the International Renewable Energy Agency (IRENA), a lead global intergovernmental agency for energy transformation, released the energy storage report ...

SHANGHAI, Nov 27 (SMM) - Sinochem International, a state-owned company mainly engaged in the chemical business, said on November 26 that a lithium-ion battery project under its Junsheng New Materials unit is about to start trial production. The pilot run involves mass production of battery cells with an energy density of 260-270 wh/kg.

Electricity storage will benefit from both R& D and deployment policy. This study shows that a dedicated programme of R& D spending in emerging technologies should be developed in parallel to improve safety and reduce overall costs, and in order to maximize the general benefit for the system.

An independent Anglo-French oil company Perenco on Friday announced it has signed an agreement with Sinochem Petróleo Brasil Ltda, the 100% owned subsidiary of Sinochem Corporation (Sinochem) to farm-out five concessions in the Espirito Santo basin, offshore Brazil. In exchange for acquiring 10% working interest in the five concession, ...

While we primarily provide petroleum and petrochemical storage services to our customers under our storage and logistics business, we also provide our customers with other value-added services including loading and unloading of trucks, vessels and pipelines, as well as wharfs of various scales, ranging from 3,000 tonnes to 300,000 tonnes.

A Sinochem source said the company was still conducting due diligence on Noble, which typically takes six months to a year. He said the company was looking at Noble's North America energy trading, which could complement Sinochem's existing portfolio. Noble specialises in shipping and storage logistics, rather than owning large production ...

The Journal of Energy Storage focusses on all aspects of energy storage, in particular systems integration, electric grid integration, modelling and analysis, novel energy storage technologies, sizing and management
