battery energy storage projects with a particular focus on California, which is leading the nation in deploying utility-scale battery storage projects. Land Use Permitting and Entitlement There are three distinct permitting regimes that apply in developing BESS projects, depending upon the owner, developer, and location of the project.

Long-term aboveground Storage Bunkers: While some nuclear companies do have storage facilities above-ground, these are temporary and meant to make the waste more accessible for reuse, or to have it decay enough for another form of disposal. However, permanent above ground storage has been discarded in favor of deeper burials within the ground.
