HOUSTON, Nov 6 (Reuters) - Midstream company Energy Transfer (ET.N) reported higher third quarter profit on Wednesday as it transported record volumes of crude oil on its systems. The Texas-based company reported net income of \$1.18 billion versus \$584 million in the third quarter of last year.

You can't take advantage of solar incentives: Lifetime savings are higher with a cash purchase or solar loan because, as the system owner, you can take advantage of solar incentives like the 30% solar tax credit. With a solar lease, the system's owner is the company leasing your panels, so the company benefits from tax incentives instead of you.

Renewable energy credits (also known as renewable energy certificates or RECs) are an initiative that represents the energy generated by renewable energy sources, such as solar or wind power facilities. Buying RECs is not equivalent to buying electricity. Instead, RECs represent the clean energy attributes of renewable electricity.

The 15 biggest companies that use solar energy are listed below. Meta: Meta, formerly Facebook, began investing in renewable energy in 2011 and became the largest corporate buyer by 2018.
