

## Hawaiian electric energy storage

Renewable energy sources resulted in 3,392 gigawatt-hours\*, or 33.3 percent, of generation in 2023, as reported to the Hawaii Public Utilities Commission in our annual Renewable Energy Portfolio status report. This does not include energy savings from solar water heating or quantifiable energy efficiency.

The 185 MW Kapolei Energy Storage project will help Oahu comply with Hawaii's requirements to shift from fossil fuels to 100% renewable energy sources by 2045. ... Other projects upon which Hawaiian Electric relies for storage on Oahu include the Mililani 1 Solar facility, which provides 39 MW of solar power and 156 MWh of battery storage ...

Leave all Hawaiian Electric Company, Inc. and Hawaii Electric Light Company, Inc. fields blank. Send the completed NDA to the respective RFP email box ... ("RFI") for potential renewable energy or storage projects on Oahu, Maui, or Hawaii Island that could be submitted to an RFP in 2024. Responses to this RFI will guide Hawaiian Electric ...

Release Date: 12/29/2022 Download PDF. WAIKOLOA, HI - Dec. 29, 2022 - The AES Waikoloa Solar + Storage project is being tested up to 85% of its capacity, producing clean energy for Hawaiian Electric to provide the Hawaii Island grid with electricity at 9 cents per kilowatt-hour, one of the lowest rates for energy in the state.. The AES Waikoloa project is Hawaii Island's largest ...

HONOLULU, May 11, 2021 - Hawaiian Electric issued the following statement on its filing of a motion for reconsideration with the Public Utilities Commission (PUC) on the Kapolei Energy Storage (KES) project: Hawaiian Electric is asking the PUC to approve the KES project but without the operational and financial conditions it imposed in its ...

Even then, it has joined the grid before several of the other large solar and battery projects slated to replace the coal plant's production with clean power. Grid batteries operate in a fundamentally different way than coal plants, so Hawaiian Electric and Plus Power crafted a new framework to replace what needed to be replaced.

Not everyone is able to install solar panels but there is still a way to benefit from solar power without installing panels. Shared Solar is a program that allows customers to use solar power from a participating solar facility, also known as a subscriber organization. This works by allowing customers to purchase one time subscriptions to leverage the output of a solar facility against ...

Hawaiian Electric serves 95 percent of Hawaii's 1.4 million residents on the islands of Oahu, Maui, Hawaii, Lanai and Molokai. Established in 1891, Hawaiian Electric is committed to empowering its customers and communities by providing affordable, reliable, clean and sustainable energy.

Non-Wires Alternative Expression of Interest - Waikoloa April 5, 2024. Through the Non-Wires Alternative ("NWA") Expression of Interest ("EOI"), Hawaiian Electric is seeking information to determine

## Hawaiian electric energy storage

whether there are cost competitive NWAs to the traditional wires solution on the island of Hawaii, that will provide sufficient load reduction beginning in 2029 to address overloads of ...

Hawaiian Electric's modeling suggests it can reduce curtailment of renewables by an estimated 69% for the first five years thanks to Kapolei Energy Storage, allowing surplus clean electricity ...

The Kapolei Energy Storage ("KES") project is located on approximately eight acres of land zoned for industrial use (I-2: Intensive Industrial). KES interconnects to the Hawaiian Electric grid at the existing CEIP 138kV substation located approximately 2,500 feet east of the project site.

Through the BYOD program, Hawaiian Electric will issue incentives to customers to add a new energy storage system to an existing or new rooftop solar system. These incentives will help move Hawaii toward our 100% clean energy goal by 2045. The Battery Bonus program is closed to new customers. Customers may apply for the new BYOD program.

A solar-plus-storage project on the island of O'ahu, Hawaii, deployed by Wartsila. Image: Clearway. Hawaii's main utility Hawaiian Electric has entered into contract negotiations with the developers of 15 renewable ...

Hawaiian Electric Co. Inc. said it plans to assemble hundreds of Tesla Inc.'s utility-scale batteries to create the largest of five proposed energy storage systems in Hawaii. ...

energy storage, standalone energy storage, or firm renewable dispatchable generation to the Company pursuant to the terms of an applicable Stage 3 Contract which will be negotiated between the Company and Proposer, and also be subject to review and approval by the State of Hawai'i Public Utilities Commission.

Plus Power has officially launched its groundbreaking Kapolei Energy Storage (KES) facility in Oahu, Hawaii, marking a significant leap towards the state's goal of achieving ...

Hawaiian Electric's modeling suggests it can reduce curtailment of renewables by an estimated 69% for the first five years thanks to Kapolei Energy Storage, allowing surplus clean electricity that would otherwise go to waste to get onto the grid. The utility also requested "black-start capability."

Battery Energy Storage Systems (BESS) In response to the August 2019 Request for Proposals, Hawaiian Electric submitted its own proposals to develop grid-tied battery energy storage systems (BESS). Two of five projects were selected by the RFP team on May 11, 2020: the Maui (Waena) and Hawaii Island (Keahole) BESS.

## Hawaiian electric energy storage

1. Be enrolled in an approved Hawaiian Electric renewable energy rate program on O'ahu and Maui (NEM/+, CGS/+, SE, CSS, SIA). (Note: Feed-in Tariff does not qualify).
2. Install a new battery for your solar system.
3. Use the battery for at least two hours every day between 6 p.m. and 8:30 p.m. The exact start time will be provided by ...

Release Date: 2/28/2024 Download PDF. HONOLULU, Feb. 28, 2024 - Hawaiian Electric will postpone the launch of its new rooftop solar and energy storage programs by one month while the company makes changes approved by the Public Utilities Commission. The new programs, originally scheduled to launch March 1, will now be available to customers starting April 1.

Release Date: 5/1/2023 Download PDF. HILO, May 1, 2023 - The AES Corporation's (AES) Waikoloa Solar + Storage project is online and feeding lower-cost renewable energy to the Hawaii Island electric grid. It is the island's first and largest solar plus storage project and can generate up to 30 megawatts supported by a 120 megawatt-hour battery energy storage system.

The old coal generator provided three key values to Oahu, Keefe explained: energy (the bulk volume of electricity), capacity (the instantaneous delivery of power on command), and grid services (stabilizing functions for the grid, wonky but vital to keeping the lights on).

installation of energy storage systems while improving grid resiliency for all customers," said Lani Shinsato, Hawaiian Electric Customer Energy Resources co-director. The monthly export credit calculation previously was pegged to February 2022 rates. Now, the calculation will reflect the rates at the beginning of each calendar quarter.

The Net Energy Metering (NEM) Program is Closed to New Applicants. Although NEM is no longer available, The Hawaii Public Utilities Commission has approved new rooftop PV programs that allow customers of Hawaiian Electric to take advantage of new energy storage technology and help ensure safe, reliable service and fair treatment for all customers.

Document; North Kohala Energy Storage RFP - Main Body (PDF) Appendix A: Definitions (PDF) Appendix B: Proposer's Response Package / Project Interconnection Data Request (PDF)

"This one-time offer is an excellent opportunity for new or existing solar customers to enjoy the added benefits of home energy storage, support the grid that serves all customers and move us closer to our 100% clean energy for electricity goal by 2045," said Yoh Kawanami, Hawaiian Electric co-director of Customer Energy Resources.

Plus Power located the project near a substation connected to three other power plants so the battery "can be AAA to jump-start those other plants," Keefe said. The combination of all these abilities in one site -- capacity, grid services, black start -- leads Keefe to call Kapolei "the most advanced battery energy storage

## Hawaiian electric energy storage

facility on the planet."

And note that in Attachment 3 (Hawaiian Electric Generation Facility Technical Model Requirements and Review Process, March 22, 2023), the Introduction page's first sentence was corrected to clarify Attachment 3 applies not just to variable renewable dispatchable generation and energy storage projects, but to all projects including firm projects.
