

How to power cycle modem with battery backup

Power cycling is an important way to "clean out" many electronic devices, from e-readers and smartphones to computers and ... cable modems! Here's the simple recipe:

- o Remove any backup battery.
- o Unplug the modem for about 30 seconds (if it's an eMTA, you can insert a pin or paperclip in the back of the eMTA where it says "reset").

These backup batteries are no longer used as they will not enable service to be used during a power outage since our equipment in the area will also be without power. If your modem has one of these batteries, you can properly dispose of it after removing it from the modem.

How to Restart Your Router & Modem. Just follow these steps to power cycle your router and modem: Step 1: Unplug the modem and router from the power outlet. Step 2: Wait at least 15 seconds. Step 3: Plug the modem ...
