To minimize the environmental impact of our operations and drive progress on our sustainability goals, we've set multiple targets, including sourcing renewables for 100% of our electricity needs and reducing Scope 1 and 2 emissions by ...

Energy Transition is about all industries adopting low carbon solutions. These include renewable energy, clean transportation vehicles, battery storage to hold energy from the sun or wind, biofuel, and more. There are, however, challenges to Energy Transition. Supply of clean fuels is low. And solar and wind power aren't available 24 hours a day.

Clean energy investment hit a record \$1.1 trillion in 2022, the first time investment in the energy transition has equaled global investment in fossil fuels, according to BloombergNEF. The task ahead is to deploy capital at an unprecedented scale to power the American economy in cleaner ways, ensuring that Americans don't have to choose ...

Importantly, the universe of investible renewable energy opportunities spans companies in power production (the supply side) but also transport, manufacturing, buildings (the demand side), info tech, and energy infrastructure such as networks and grids. That means an investor has many opportunities across the full value chain of this transition.

10-year target to include \$1 trillion for green initiatives, such as renewable energy and clean technologies. JPMorgan Chase aims to finance and facilitate more than \$2.5 trillion over 10 years - beginning this year through the ...

Two renewable energy companies owned by JP Morgan Asset Management-advised institutional investors today announced their plan for a merger to create an independent power producer (IPP) with over 4.2 GW of total installed capacity and an 18-GW pipeline. Specifically, Italy-based Renantis SpA will combine with pan-European peer Ventient Energy ...
