National Renewable Action Plan of Lebanon (NREAP 2016-2020) Directive 2009/125/EC of the European Parliament and of the Council with regard to ecodesign requirements for air

1. Define energy storage as a distinct asset category separate from generation, transmission, and distribution value chains. This is essential in the implementation of any future regulation governing ESS. 2. Adopt a comprehensive regulatory framework with specific energy storage targets in national energy

Solar energy is also a valuable resource in Lebanon. With around 3000 hours of sunshine, the addition of this energy source to the national grid could greatly contribute to the growth of clean energy in Lebanon (Kinab, El Khoury, 2012). Solar energy currently represents around .26% of the country's energy mix (UNDP, 2017).
