I have been thinking about putting in a separate battery for my Livescope setup. I've been exploring buying a Lithium battery strictly for my Livescope. Have any of you guys used a 12v, 20+AH Lithium battery? Also, I've read where some people say your unit and the black box should be on the same battery.

what typ.e battery is best to power a livescope and a helix 12? I've heard both 12v and 16v lithium but need clarification. Also best place to purchase it. I'm not running anything else off this battery. also what ah. I'm assuming at least 75ah. thanks

I researched this before buying a lithium battery. You take the amp draw of Livescope system time the amount of usage time you need to get AH size battery you need. Here is the numbers for my unit. Garmin 93SV/livescope black box draw 2.8 amps. I needed my unit to run 6hrs at a time. 2.8 amps x 6 hrs = 16.8ah or more needed to run livescope for ...

## Lithium livescope battery

A lithium-ion battery is used for this device. If these guidelines are not followed, batteries may experience a shortened life span or may present a risk of damage to the device, fire, chemical burn, electrolyte leak, and/or injury.

- o Use only the external battery charger provided by Garmin&#174;.
- o Only use the battery with Garmin approved ...

Similarly, I have a Precision Power Lithium 12-volt 100Ah battery that only runs my two graphs and my Livescope. And people ask me all the time why my 8616 screens look so clear and sharp. And people ask me all the time why my 8616 screens look so clear and sharp.
