Adelaide Road in Nassau, is the ideal storage solution for western New Providence. Conveniently near Albany, Coral Harbour, and Lyford Cay, our secure facility offers easy access for ...

Large photovoltaic (PV) solar arrays will capture the energy from the sun and send it to our country's electricity grid. What steps are required as The Bahamas moves forward with utility-scale solar power, and what are the costs? Island-by-island planning. Every one of our inhabited islands is different, and requires a unique set of solutions.

A battery's capacity is the total amount of electricity it can store measured in kilowatt-hours (kWh). A battery's power tells you the amount of electricity that it can deliver at one point in time measured in kilowatts (kW). It is important to consider both capacity and power when evaluating solar batteries. A battery with high capacity but low power can only provide a small amount of ...

The Government is targeting five New Providence locations for the installation of utility-scale renewable energy facilities, each featuring up to 20 MW of solar, to make up a ...

Making those plans a reality involves a dramatic scaling up of solar capacity from the capital in Nassau out to its more sparsely inhabited "family" islands that account for roughly 30 of the 700 islands that make up the country.
