The Wellington battery energy storage system (BESS) is planned to be installed in the namesake city, located in Central West New South Wales, to complement existing and ...

The Site. The proposed site is approximately 2km north-east of Wellington, adjacent to TransGrid's 330kV zone substation as depicted below. The BESS will occupy an area of ~10 hectares adjacent to the electricity grid and sharing a boundary with the TransGrid substation, this will reduce the need for high voltage power lines and visual impacts.

While this paper explores the potential rising value of storage and flexibility to solve the intermittency of renewables, we remain positive on the future of renewable power development. Meeting the enormous challenge of the energy transition will require traditional fossil fuels, bridge fuels like natural gas, and renewables.
