o Battery energy storage system specifications should be based on technical specification as stated in the manufacturer documentation. o Compare site energy generation (if applicable), and energy usage patterns to show the impact of the battery energy storage system on customer energy usage. The impact may include but is not limited to:

If you don't have solar energy battery storage, the extra energy will be sent to the grid. If you participate in a net metering program, you can earn credit for that extra generation, but it's usually not a 1:1 ratio for the electricity you generate. With battery storage, the extra electricity charges up your battery for later use, instead of ...
