

# New mexico energy storage

The New Mexico Public Regulation Commission (NMPRC) has approved an application from Public Service Company of New Mexico (PNM) to add 309.5MW of energy storage to the investor-owned utility's portfolio by ...

The newly enacted Energy Transition Act (SB 489) is a promise to our planet, to our health and to future generations of New Mexicans. The Energy Transition Act places New Mexico at the forefront of tackling climate change in the United States, which requires the state to shift to 100% carbon-free energy by 2045.

EDF Renewables in North America has signed a 150MW solar-plus-storage 20-year power purchase agreement (PPA) with utility El Paso Electric in New Mexico, US. The Milagro solar-plus-storage project will be ...

New Mexico is emerging as a leader in renewable energy and wind energy already accounts for producing 20% of total electric utility generation in the state. At AES, we want to utilize new technologies and innovation to help New Mexico achieve its goal of generating 100% of electricity retail sales from renewable sources by 2045. AES has nearly ...

in New Mexico Thrive. Study and update confirms opportunity to see \$11 billion in private investment. The study concludes there is enough renewable energy resources for development in New Mexico to meet the Energy Transition Act's (ETA) requirement of 50% renewable electricity for utilities and rural electric cooperatives by 2030.

The New Mexico Energy Transition Act requires, with some qualifications, "(c) a target of achieving the zero-carbon resource standard by January 1, 2050, composed of at least eighty percent renewable energy...", and also addresses storage deployment,

The inaugural New Mexico Advanced Energy Award Pilot Program awardees are: Flow Aluminum: \$400,000 ... grid storage, and other energy-storage applications to accelerate the transition to electrification. Flow Aluminum's technology is based on research developed in collaboration with the University of New Mexico. GridFlow: \$300,000 ...

Enlight Renewable Energy, a global renewable energy platform, announced that it has closed on financing for the energy storage portion of its flagship Atrisco Solar and Energy Storage project, located outside Albuquerque, New Mexico.

2019, the most significant regulatory policy pertaining to energy storage in New Mexico is the unanimous decision by the PRC to revise its rules governing utility Integrated Resource Plans. A summary of those changes is provided below.

# New mexico energy storage

Friday, the New Mexico Gas Company [NMGC] filed an application with the state's Public Regulation Commission hoping to authorize construction for a new liquefied natural gas storage facility. If approved, the facility would have a 1 billion cubic foot storage tank, according to the gas company.

Two solar and battery storage projects in rural areas of New Mexico -- one on Taos Pueblo land, and another throughout the Navajo Nation -- could receive \$18 million in federal dollars to cover ...

The New Mexico Public Regulation Commission has approved an application from Public Service Company of New Mexico to add 309.5MW of energy storage to the investor-owned utility's portfolio by summer 2026. New Mexico regulator approves PNM's 12MW/48MWh of BESS for overloaded network lines.

New Mexico has a statewide goal of 100% carbon-free electricity by 2045. Currently, New Mexico has over 5.2 GW of solar, wind, and storage capacity, making it the eleventh largest generator of renewable electricity in the nation. There is 1.1 GW of additional planned clean energy capacity in the works in the state, enough to power more than 157,000 ...

Tesla's Megapack energy storage tech will be used to help New Mexico's Public Service Company (PNM) to replace a retiring 562 MW coal plant, the San Juan Generating Station.

ECMD is committed to developing and deploying solutions that will maximize New Mexico's renewable energy resources and improve energy efficiency and transportation standards. ECMD is the U.S. Department of Energy's designated State Energy Office. ECMD receives funding through the federal State Energy Program to support many of its initiatives.

Energy Storage Prosperity Energy Storage Project. The nation's first energy storage facility fully integrated into a utility power grid. ... PNM serves more than 530K New Mexico residential and business customers in Greater Albuquerque, Rio Rancho, Los Lunas, Belen, Santa Fe, Las Vegas, Alamogordo, Ruidoso, Silver City, Deming, Bayard ...

The New Mexico legislature created RETA in 2007 making it one of the first independent state authorities in the nation to . facilitate the licensing, construction and financing of high voltage transmission lines and energy storage projects, allowing delivery of renewable energy from remote areas that have enormous renewable energy potential to in-state and out-of-state ...

PNM is the only utility in New Mexico with energy storage capability at present. PNM's Prosperity Energy Storage project includes a 500 kV solar PV facility with a 250kW, 1 MWh energy storage ...

The New Mexico Renewable Energy Transmission Authority was created by New Mexico lawmakers to facilitate the development of electric transmission and storage projects. The result is that power can be moved across New Mexico in addition to exported out of New Mexico. Learn more about RETA by visiting [nmreta](http://nmreta.com) .

## New mexico energy storage

Storage units in Alamogordo, NM, Rio Rancho, NM, and Los Lunas, NM have low starting rents of \$19, \$30, and \$50, respectively. Browse storage units in all New Mexico cities for more information.

EDF Renewables in North America has signed a 150MW solar-plus-storage 20-year power purchase agreement (PPA) with utility El Paso Electric in New Mexico, US. The Milagro solar-plus-storage project will be located on undeveloped private land in the Santa Teresa area of Doña Ana County and is expected to reach commercial operation in 2025.

This paper investigates the future pathways for achieving the decarbonization goals in New Mexico, mandated by the New Mexico Energy Transition Act (NMETA). A long-term capacity ...

The 2023 Energy Storage Workshop was attended by 200 local and national experts with a variety of perspectives. 2023 RETA Workshop Agenda. ... New Mexico's Clean Energy Future: Key Partnerships and Strategic Direction; JD Rulien - The Evolution of Energy Storage; Chad Spring-Enduring Energy: Nickel Hydrogen Battery System ...

Enlight Renewable Energy has completed its Atrisco solar and energy storage project outside Albuquerque, New Mexico. The project, developed and built by Enlight's U.S. ...

To date, we operate solar projects in more than 30 states, including 3 large-scale solar projects in New Mexico. The energy storage component of this project uses batteries to store renewable energy and make it available even when the sun isn't shining, improving the reliability and efficiency of the electric grid and making more renewable ...

from the wind and sun, and a world leader in battery energy storage. "We are pleased to work with PNM and Meta to bring online New Mexico's newest solar energy center." The Sky Ranch Solar Energy Center, located in Valencia County, is a 190megawatt (MW) solar facility - paired with a 50 MW 4-hour battery energy storage system.

As of October 2024, the average storage system cost in New Mexico is \$1300/kWh. Given a storage system size of 13 kWh, an average storage installation in New Mexico ranges in cost from \$14,360 to \$19,428, with the average gross price for storage in New Mexico coming in at \$16,894. After accounting for the 30% federal investment tax credit (ITC) ...
