Prerequisite: PV 101 or NABCEP credential or Licensed Electrician Total Course Hours: 4 Time to Complete: 365 days Course Instructor: Nick Matthes. Student Resources & FAQs; Full Course Description; Are you enrolling one of your employees? Learn how to use the Bulk Enroll function in Catalog. Do you have five or more employees to register?

--Nick Matthes Solar Project Manager, MREA Blue Planet Energy Supports Renewable Education in Midwest The Midwest Renewable Energy Association (MREA) is a nonprofit dedicated to educating communities on renewable energy and sustainable living. Year-round, MREA offers professional training for those looking to join the clean energy workforce.

(PV 604) Inspecting PV Systems. This four-hour course reviews National Electrical Code (NEC) requirements, paying particular attention to Articles 690 and 705. It also covers equipment listing and labeling requirements, circuit calculations, wiring methods, grounding, overcurrent protection, system labeling requirements, and common Code violations.

Solar electric (PV) power has gone from a niche "alternative energy" to a mainstream market thanks to improvements in technology, lower prices, and an acute awareness of the environmental and societal benefits of producing and using renewable energy in lieu of harmful and finite fossil fuels.

Prerequisites: Basic Photovoltaics (PV 101) This is a two-day in-person course held at MREA's Energy Storage Tech Center in Custer, WI. Class times are 9a.m. - 5p.m. CT. Energy storage fundamentals and designing solar plus storage systems will be covered. 7558 Deer Rd Custer, WI 54423. Area Accommodations. Required Materials:

Hosted by MREA's Nick Matthes, this virtual platform brings together renewable energy experts and professionals to share knowledge, experiences, and best practices in solar and storage. Whether you're a seasoned pro in the field or just getting started with renewable energy, these webinars offer valuable insights for all skill levels.

Discover Illumination Solar's Mobile Solar Training Lab showcased under the PV Pergola during Industry Demo Day. These interactive training labs provide affordable, hands-on solar training that can be easily
