Here's Our Guide on Solyndra. The bankruptcy of solar firm Solyndra has raised concerns that the Obama administration shouldn't have loaned the company money via a stimulus program. We break it all down. This post has been updated.

In a significant development for the renewable energy sector, SunPower Corporation, once a major player in the solar industry, has filed for Chapter 11 bankruptcy. This comes after the company received substantial government funding during the Obama administration. The story, covered by both Charles Payne on Fox Business and finance ...

Despite the extraordinary failures of his green energy investment program, President Obama recently touted his efforts at a solar plant in Colorado.. The plant cost \$141 million to build and was financed with \$42 million in federal tax credits and \$12 million in tax rebate commitments from Nevada.; The plant created 300 part-time construction jobs, but only 10 full ...

President Obama exaggerated when defending his administration's approval of a \$535 million loan guarantee to Solyndra, a now-defunct solar company. Obama referred to Solyndra's loan at an Oct. 6 press conference as "a loan guarantee program that predates me." That's not accurate.

The loan guarantee program that provided financing for Solyndra, however, does not predate Obama. There are two loan guarantee programs for renewable energy companies. The first was created under section 1703 of Title XVII of the Energy Policy Act of 2005.

The bankruptcy of solar energy company Solyndra is being investigated by the FBI. The company received government loans and President Obama's endorsement in 2009. During a House hearing Wednesday ...

Obama investment in solar company
