The company compares its size to a water bottle, and while it's a bit larger than that, the turbine is still portable enough to be carried in a backpack. The Shine 2.0 generates power in wind speeds ranging from eight to 28mph, and at max speed, it can produce up to 50W of power, which is enough to fully charge a laptop in about two hours.

The Shine portable wind turbine is available now with everything described above for \$399.99. That includes everything you need for a basic setup straight out of the box: The turbine itself ...

A fully-functional 40W wind turbine which packs down to the size of a water-bottle -- or so Aurea Tech claims. (?: Aurea Technologies) Weighing just 3lb and with an integrated 12Ah battery, usable while the turbine is in packed-away mode, Shine is said to offer IP54 resistance against the elements and to produce usable energy in wind speeds between 8 and 28 miles per hour.

It's time to ditch portable power banks, solar panels, and power stations as your go-to sources to fuel outdoor adventures. Meet Shine, a portable wind turbine that "creates energy faster than any other portable renewable product." This small but mighty turbine, developed by Aurea Technologies, sets up in two minutes and can provide a full charge for your phone in 20 ...
