

# Solar panels for low-income

Solar for All will expand existing low-income solar programs and launch new ones. The 60 selected applicants will serve households in all 50 states, the District of Columbia, Puerto Rico, and territories, as well as increase access to solar for Tribes.

SIMON: Nothing. SALAS: (Speaking Spanish). SIMON: Soon, more low-income households like his will get affordable solar energy. A new Environmental Protection Agency program is giving \$7...

Updates. Today, the U.S. Environmental Protection Agency (EPA) launched a \$7 billion grant competition through President Biden's Investing in America agenda to increase access to affordable,...

Funded under the Greenhouse Gas Reduction Fund, Solar for All provides financial and technical assistance to state entities, multistate programs, and organizations to deliver residential solar projects to low-income and disadvantaged households nationwide.

By funding programs that provide rooftop solar panels, batteries to store solar energy, and community solar farms, the EPA expects to help more than 900,000 low-income households reduce...

GRID's Energy for All Program provides NO-COST solar for families with low incomes. You can save up to 90% on your electricity bills! APPLY NOW! GRID Alternatives' Energy for All program makes solar power accessible to families who need the savings most, while providing hands-on solar installation experience to volunteers and job trainees.

The Clean Energy Connector--formerly known as the Low-Income Clean Energy Connector--is a digital tool that makes community solar subscriptions with savings more accessible to households participating in government-run low-income support programs.

Under the \$7 billion Solar for All program, the 60 grant recipients will create new or expand existing low-income solar programs, which will enable over 900,000 households in low-income and disadvantaged communities to benefit from distributed solar energy.

Last year, the U.S. Department of Energy announced a target of powering five million households with community solar by 2025, an increase in community solar deployment of more than 700% over the next four years. The low- and moderate-income community solar market, in particular, promises massive growth.

Residential solar cuts home energy bills and provides families with resilient and secure power, and Solar for All will help low-income and disadvantaged communities experience these meaningful benefits, such as guaranteeing a minimum 20% total electricity bill savings for households benefiting from the program.
