

The typical cost for a 4kW solar system is around \$8,000. It is essential to note that prices for solar systems have significantly decreased over the past decade. As advancements in technology have made solar panels more efficient and affordable, the barrier to entry for homeowners interested in solar energy has diminished.

4kW solar power systems have been a popular choice for medium sized families over the years, however they are becoming less widespread as 5kW systems have become more affordable. For the average sized Australian family, a 4kW system is a good option as it's capable of covering average power consumption, helping to reduce power expenses.
