

Uninterruptible power supply

An uninterruptible power supply (UPS) greatly benefits homes, offices and businesses. It ensures a continuous power supply, even during power outages or fluctuations. This is crucial for sensitive electronic devices such as computers, Wi-Fi routers, and point-of-sale (POS) equipment.

An uninterruptible power supply (UPS) or uninterruptible power source is a type of continual power system that provides automated backup electric power to a load when the input power source or mains power fails.
