Balance of the day (bal-day) is a contract that settles at the average on-peak real-time price at a particular hub for the remainder or balance of the day. For example, if someone buys a contract for the remainder of the day for \$20/MWH and the real-time (RT) hub price settles at \$25/MWH, that trader will have made \$5/MWH.

With the V-Power Day Trading System, traders can take advantage of the behavior of the smart money and boost their performance to join the elite club of professional traders.

The Free V-Power Trading System is a profitable day trading strategy, as stated in this article. The creator and developer of this system, Mike Semlitsch, calls it "V-Power", but it was previously known as "The Very Powerful" system. This trading system gained its name from the characteristic "V" and inverted "L" patterns that appear on the forex charts.
