So, reducing energy consumption can inevitably help to reduce emissions. However, some energy consumption is essential to human wellbeing and rising living standards. Energy intensity can therefore be a useful metric to monitor. Energy intensity measures the amount of energy consumed per unit of gross domestic product.

However, Dar Es Salaam is the port of choice for goods coming from Asia. Some of the ports that are used for shipping goods destined for Zambia are Durban, East London and Port Elizabeth (South Africa) and Beira and Nacala (Mozambique).

A battery energy storage system is a sub-set of energy storage systems, using an electro-chemical solution. In other words, a battery energy storage system is an easy way to capture energy and store it for use later, for instance, to supply power to an off-grid application, or to complement a peak in demand.
